

How to Identify NXT Battery Pack and Power Charger

New style, DC NXT Battery:

Light grey

10V DC embossed on lower front.

DC Power Supply:

Transformer is rectangular, and not vented.

Cord would be positioned to the side when plugged into a standard outlet.

Old Style AC NXT Battery:

Darker grey

8-12V embossed on lower front

AC Power Supply:

Transformer is more square with vented sides.

Cord would be positioned under the prongs when plugged into a standard outlet.

Note: It is not possible to plug an AC power supply into the DC battery pack or vice versa.
